Paper Submission

WIFS 2019 Paper Submission Guidelines

1. Prospective authors are invited to submit regular papers of up to six pages including figures and references for consideration by the WIFS Technical Program Committee.
2. The review process is single-blind, i.e., the identity of the reviewers is shielded from the authors, but manuscripts may contain author names, affiliations, and other identifying features (e.g., grant numbers, references to own prior work in first-person form).
3. The author list at submission time is final and cannot be changed.
4. All papers must be submitted electronically through Easychair (https://easychair.org/conferences/?conf=wifs2019) and have to be formatted according to the IEEE guidelines for conference proceedings (see below).
5. Submitted papers must not have been published, accepted or be under review elsewhere. Significant overlap with other publications should be avoided and, if unavoidable, be brought to the attention of the Technical Program Chairs at the time of submission.
6. Papers accepted and presented at WIFS 2019 will be available in the IEEE Xplore digital library.
7. Authors are required by the IEEE to transfer copyrights for any papers to be published in the conference proceedings. This is performed at the time when the camera ready version is submitted for production. If a paper is withdrawn from the proceedings, copyright is returned to the authors.
8. Each accepted paper must be presented by one of the authors, and at least one full registration per paper is required.
9. If no authors attend the workshop to present their work, the paper will be withdrawn from the proceedings and from IEEE Xplore.
10. Please use one of the submission templates as can be found below.
